

Method rename: `A.bar()` \rightarrow `A.foo()`

```
- public static void bar() {  
+ public static void foo() {  
- A.bar();  
+ A.foo();
```

Method modification: `A.foo()`

Method formatting: `A.foo()`

```
- if (a.isFoo()) return 0;  
+ if (a.isFoo()) {  
+     return 0;  
+ }
```
